## IN THE CLAIMS

Please amend the claims as follows:

- 1. (original) A light-emitting device, comprising at least a substrate (1), an anode (2), a light-emitting layer (4) and a cathode (6), wherein the light-emitting layer (4) contains an iridium complex IrL<sub>3</sub> and wherein at least two ligands L are a dibenzoquinoline.
- 2. (original) A light-emitting device as claimed in claim 1, characterized in that two ligands L are a dibenzoquinoline, and a third ligand L is selected from the following group: pentane-2,4-dionate (acac), 2,2,6,6-tetramethyl-3,5-heptane dionate (thd), 7,7-dimethyl-1,1,1,2,2,3,3-heptafluorine-4,6-octane dionate (fod), 1,1,1,5,5,5-hexafluoropentane-2,4-dionate (hfa), 4,4,4-trifluorol-(2-thienyl)butane-1,3-dionate (ttfa), 1,3-diphenyl propane-1,3-dionate (dbm), 4,4,4-trifluorine-1-(2-naphthyl)butane-1,3-dionate (tfnb) and 4,4,4-trifluoro-1-(1-napthyl)butane-1,3-dionate.
- 3. (original) A light-emitting device as claimed in claim 1, characterized in that all the ligands L are dibenzoquinolines.

- 4. (currently amended) A light-emitting device as claimed in any one of the claims 1 to 3claim 1, characterized in that the dibenzoquinoline is dibenzo[f,h]quinoline.
- 5. (original) A light-emitting device as claimed in claim 2, characterized in that two of the ligands L are dibenzo[f,h]quinoline, and one of the ligands L is pentane-2,4-dionate (acac).
- 6. (original) A light-emitting device as claimed in claim 1, characterized in that the light-emitting layer (4) contains further light-emitting materials.
- 7. (original) A light-emitting device as claimed in claim 7, characterized in that the further light-emitting material is a further iridium complex.
- 8. (original) An iridium complex  $IrL_3$  in which at least two ligands L are dibenzoquinolines.
- 9. (original) Ir(dibenzo[f,h]quinoline)2(pentane-2,4-dionate).
- 10. (original) Ir(dibenzo[f,h]quinoline)3.
